

Dave Tang

University of Western Australia, Australia

Dave Tang is currently a post-doctoral researcher in the School of Molecular Sciences at the University of Western Australia in Australia. He received his PhD in computational biology from the Vrije Universiteit in the Netherlands as a Marie Curie Early Stage Researcher. His research interests have focused on studies in the genomics and transcriptomics fields. More recently he has concentrated his research in the field of single cell transcriptomics. He is an open-science advocate and maintains a highly popular bioinformatics blog.
