

Hye Ryoun Kim

Chung-Ang University College of Medicine, Korea

Dr. Hye Ryoun Kim is a professor in the Department of Laboratory Medicine at Chung-Ang university medical center. She has experienced a lot of hematologic malignancy and chromosomal abnormality. She has made the diagnosis of various hematology includes the study of blood cells and coagulation. She has used the molecular biological techniques had led to detection of several genetic mutations in hematologic disease. She has a particular interest in cytogenetic and molecular procedures for the diagnosis and treatment of hematological malignancy. She has focused on the molecular diagnostic evaluation and monitoring of the hematologic and lymphoid tumors. Molecular investigation is very important for a diagnosis, a classification, a prognostic value of disease and the presence and extent of minimal residual disease. She was awarded a number of honors and scientific prizes; 2017~2020 Nominated The Basic Science Research Program, National Research Foundation of Korea.
