

Vincent Delatour

Laboratoire National de Métrologie et d'Essais, France

He currently coordinates R&D activities in bioanalysis at LNE, the French national metrology institute located in Paris. He received his Ph.D. in cancer research from Paris University. He is a member of IFCC Working Groups on biomarker standardization in cardiovascular disease, Alzheimer's disease, Sepsis and Osteoporosis. His main research interests include the development of mass spectrometry-based reference methods and the production of international standards for procalcitonin, Tau protein and apolipoproteins.
